

POSITION:

Laboratory Analyst for a Specialty Pharmaceutical Company.

JOB PURPOSE:

The Laboratory Analyst is responsible for testing of products for pharmaceutical use including raw materials, in-process samples, research and development, clinical and commercial products. Reports to Director of Quality Control.

DUTIES:

The candidate will prepare reagents, solutions, and media needed for testing. With training, the analyst will apply testing techniques including HPLC, Dissolution, Viscometry, Karl Fischer Analysis, Water Sorption Studies and Texture Analysis for the analysis of raw materials, in-process, finished pharmaceutical formulations, research and development formulations, and packaging components according to Standard Operating Procedures (SOPs) and Analytical Testing Methods.

QUALIFICATIONS:

Minimum of a bachelor's degree in a science-related field, preferably Chemistry.
Proficiency in use of software including Microsoft Word and Microsoft Excel.
Good communication and writing skills.

Located in Bergen County, Northvale, New Jersey.
We offer a competitive salary and benefits package.
